

Corporate Overview

Company Background

FNTI is a national company providing backfile image conversion of mid to large size projects for markets such as financial services, insurance, government and education. FNTI utilizes the latest technology and methodology to successfully complete some of the most complex projects in the US. To illustrate, FNTI recently accomplished several projects one being a conversion of 290 million images in less than 75 days.

FNTI is headquartered in Milpitas , CA with distributed production centers across the nation;

- Hayward, CA
- Ontario, CA
- Chicago, IL
- San Antonio, TX
- Orlando, FL
- Portland, OR

Mission Statement

To provide our customers with the highest level of service and best solution possible, to help them quickly and accurately convert their physical documents to digital image without compromising the quality of the results.

Imaging Services

FNTI is one of North America's largest providers of document capture and conversion services, and has become one of the largest conversion houses for land title records in the world! With our state-of-the-art technology, we are capable of scanning 150 million images per month.

FNTI specializes in the conversion of paper, microfilm, microfiche, aperture cards, large-scale drawings, and books to electronic formats. We provide full conversion services from the pick-up of files through scanning, indexing, OCR, quality control and export of the archive to the final imaging solution.

Production Centers

FNTI's headquarters and primary production facility is located in Milpitas, California, with over 120 full-time employees across the U.S. FNTI's other production centers are located in: Hayward CA, Ontario CA, Portland OR, Chicago IL, Orlando FL, and San Antonio TX.

FNTI also specializes in on-site conversions, working directly with the client to ensure the safety and confidentiality of their documents by providing our services at their location. In such situations, FNTI will transport all necessary equipment to the client's location and will perform all services as required to execute the project.

Organizational Staffing

FNTI is structured to emphasize teamwork and communication. Our team of trained technicians and knowledgeable scanning and indexing staff has many years of experience, allowing us to consistently increase production efficiency without compromising the quality of our services. All departments and employees work closely with each other, promoting an efficient workforce. Project Managers, Systems Engineers, and Sales Managers are always easily accessible through email, voice-mail and in person. It is important that everyone understands the specific objective of each client project and that is why FNTI emphasizes cross-departmental responsibility and accountability.

Project Management

Quality is the result of effective project management. The underlying philosophy of FNTI's approach to project management is to create an environment in which work effort is carefully planned and where progress is tightly monitored so that our clients receive the highest quality deliverables that meet or exceed their expectations.

Emphasis on Quality

FNTI's proven conversion process is both high-speed network based and automated via our Production Control Database. This combination enables real-time tracking and reporting of the media population through each stage of the conversion process. As a result, our process provides a high degree of accountability, population integrity, and output quality. Our production parameters are designed on the axiom that control and accountability remain the keys to effective Quality Assurance.
